

Save the Manatee County Shoreline

Sign the petition on-line at: ipetitions.com/petition/save-manatee-coastline

Developers have requested that the Board of County Commissioners approve zoning changes and changes to the county comprehensive plan in order to construct a large project in SW Manatee County along Sarasota Bay. These changes would allow “multiple use” instead of just residential. That would permit construction of:

- 1,086 single-family homes
- 1,687 low-rise multi-family homes
- 844 high-rise multi-family homes
- 300-room hotel
- 300-berth marina and canal
- Two 36,000-square-foot offices
- 60,000-square-foot shopping center
- 60,000-square-foot specialty retail
- 84,000-square-foot conference center

And, all this on less than 600 acres, much of which is in a “Costal High Hazard Area”.

There is no doubt that the mangrove forest and sea grass along the coast there would be damaged or destroyed if this project is approved by the Board. Please sign the on-line petition and help save our shoreline.
